

Home EV Charger Installation

DTE Energy's Home EV Charger Installation service makes it easy for you to get a Level 2 EV Charger or a 240-volt outlet installed for your electric vehicle (EV).

From getting a free quote to selecting a charger installation date that fits your schedule, our online portal guides you on your journey to home EV charging.

How it works:

1. Get Your Quote

Sign into our portal at evdte.com to answer a few questions for a free quote

2. Select Your Installation Date

Provide a few potential install dates that work best for your schedule

3. Your EV Charger Installed

A DTE-certified electrician comes to your home, confirms the estimate with you and installs your charger

Expert Installation

Installation of your Level 2 EV charger will be fully serviced by a local DTE-certified electrician.

Licensed, insured and rigorously screened, DTE-certified electricians are expert in best practices, manufacturer guidelines and local building regulations.
